

Phenix City on the Move

by Eleanora Nobles

Plant 4 is making modifications to its waste wood unloading system. The system is being designed to efficiently run our renewable fuel sources. The modifications being made are to the drag conveyor and belt system. Seal Arc Welding, Inc. and Brown & Son are busy making the changes. Seal Arc Welding, Inc is owned by Hock. He is well known around Boral Bricks. Brown & Son is owned by Mr. Tillman Smith. If you come by, you will see cranes, welding, grinding, and electrical wiring being done. The Contractors have been doing a very good job wearing their safety equipment and communicating with one another. We here at Plant 4 would like to thank our contractors in doing such a good job in performing their job safely. THANKS GUYS!
